Paved, awaiting roller

Before

Chuck on roller

Entire crew

Paving with HEI-WAY® General Purpose cold asphalt material is a big time- and money-saver, especially for smaller townships with limited budgets and crews.

With a crew of three and the basic equipment you see here, you can do paving, mechanical patching, road widening, shoulder reinforcement, or smoothing of rutted roads.

You can do all this out of a PennDOT-approved¹ stockpile, at your own pace, and put your dollars to work directly on your roads, not in the contractors' pockets.
